

Be a Hero Save a Life

A Defibtech AED in the workplace can make the difference between life and death.

SUDDEN CARDIAC ARREST is the abrupt loss of heart function in a person who may or may not have diagnosed heart disease.

Life-Saving Technology Within Reach

Each year, sudden cardiac arrest strikes

more than 400,000 people — and without intervention, less than 1% of victims survive. In fact, sudden cardiac arrest is the leading cause of death in North America. And it can affect people of all ages — any time and anywhere.

A Simple Step That Saves Lives

While there's no way to predict or prevent sudden cardiac arrest, we do know that cardiopulmonary resuscitation (CPR) and defibrillation with an automatic external defibrillator (AED) *within three minutes* has shown to increase the chance of survival 70%. AED technology is so powerful that most CPR training courses now include a section on the use of these devices.

And yet, in a crisis, there's no time to read a training manual. Fortunately, the **Defibtech AED** is simple, clear and straightforward to use. The **Defibtech AED** is built to exacting medical standards — but it's also designed to be fast and simple for *anyone* to use.

The Defibtech AED:

- » **Provides step-by-step instructions that are loud and clear — even when there's a lot of ambient noise**
- » **Ranks as the top choice of many First Responders**
- » **Has 5+ years of field-proven durability — including use in military settings**
- » **Offers convenient SD card for no-charge upgrades when CPR guidelines change**
- » **Features a brightly lit Active Status Indicator powered by a 9V battery, allowing the main battery to remain fully charged to save a life**
- » **Has lowest overall cost of ownership of all AEDs in its class**
